(54) WASHING NET FOR SHOWER CURTAIN

(57) Abstract:

PROBLEM TO BE SOLVED: To obtain a nylon net with a fastening string having hook holes and a tape which enables cleaning of foul on both sides of a shower curtain by slightly enlarging the washing net in size to cover the entire area of the shower curtain and rolled in piles when the shower curtain is washed totally at a time with a washing machine.

SOLUTION: A hung shower curtain is spread, the net 1 is spread to match with a fouled area thereof and hook holes 2 of the net 1 are put on hooks of the shower curtain. The hung two sheets are rolled from below with the net 1 outside and wrapped by a fastening string 3 with a tape 4. The sheets are taken off from the hooks and washed in a washing machine with a detergent therein. Dehydration is restrained to prevent possible breakage. The washing net is put as intact on the hooks of the shower curtain and then taken off the hooks. The shower curtain is dried as it is. The net 1 is squeezed lightly to drain moisture and dried under a better draft.

DETAILED DESCRIPTION

[Detailed Description of the Invention]

In case this invention washes a shower curtain whole with a washing machine, it is a network made of a hook hole and stop restricted nylon to which magnitude is carried out somewhat greatly slightly, is put, and is wound around so that the whole may be hit, and dirt is dropped. In order to wash a shower curtain conventionally, when grinding against a scrubbing brush etc. or washing whole with a washing machine, in order to prevent failure Although it was good when washing briskly in that case, although it was carrying out refraining from dehydration and washing together with other washing etc., when only the nylon towel from which there are also worries whether the mold attached to the shower curtain is attached to other washing, and the body is washed was put in and it washed with a washing machine, the portion folded since the area of a shower curtain was large did not rub against the nylon towel well, and dirt did not come off finely. This invention was invented in order to reply to a strong request of such a user. Hereafter, explanation of the operation using the structure and hook sets the network which opened the shower curtain hung (b) to the side which extended and became dirty.

(b) Hang the hook hole of a network on the hook which hung the shower curtain.

(c) Carry out a network outside, roll the two hung sheets lapping from the bottom, and wrap and stop them with a stop string with a piece of Velcro.

(d) Remove from a hook, put in and wash a detergent etc. with a washing machine, and in order to prevent failure, refrain from dehydration.

(e) Hang and extend to the hook of a shower curtain then, remove a network from a hook, and dry a shower curtain as it is.

A (**) network wrings moisture lightly and dries it in a well ventilated place.

If it carries out like this, the dirt of the whole front reverse side of a shower curtain will be removed, easily, even if the operation using a hook does not use a hook, it can be used, water-break dryness also prevents generating of mold early, the network made of nylon folds it up small, and receipt is also possible.
